*Joint Marketing Statement Relating to the Reseller Agreement
Over the last 20 years, SAP and Oracle have worked together to provide customers with a supported SAP-Oracle environment, when running SAP applications on top of an Oracle database. SAP also has enjoyed the right to resell to customers a license to use an Oracle database in connection with SAP applications, as well as the right to support the combined SAP and Oracle offerings. SAP and Oracle would like to announce that they have recently agreed to an extension of their reseller and support agreement.

This extension continues the existing Oracle and SAP relationship. For the next three years (through December 31, 2017), SAP customers can continue to acquire Oracle licenses from SAP to support SAP business applications. For an additional period of two years, SAP will continue to provide integrated support for SAP-Oracle application packages (through December 31, 2019) and has committed to support SAP Business Suite 7 core application releases through 2025. SAP and Oracle will continue to provide customers with additional joint statements and details at www.oracle.com/sap and on the SAP partner site.
